

Kanan A. Mehta

Senior Frontend Engineer | React.js | Next.js | TypeScript

Abu Dhabi | (+971) 504945969 | kansumehta@yahoo.co.in | [LinkedIn Profile](#) | [Github](#)

Professional Summary

Senior Frontend Engineer with 10+ years of experience designing and scaling modular, high-performance web applications across cybersecurity, banking, and high-traffic consumer platforms. Deep expertise in React, Next.js, TypeScript, Tailwind CSS, and enterprise frontend architecture. Proven record leading legacy-to-modern design system migrations, building reusable component libraries, and integrating real-time streaming architectures. Actively engineering modern AI-enabled interfaces and full-stack web applications with Next.js, TypeScript, and state-driven paradigms.

Core Skills

- **Frontend:** React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI, SCSS, Responsive Design, PWA
- **APIs & Real-Time Data:** REST APIs, WebSockets, Server-Sent Events (SSE), Node.js, Sitecore, Coveo, Postman
- **Security & Auth:** JSON Web Tokens (JWT), Web Security, Single Sign-On (SSO), RBAC, OAuth2
- **State & Architecture:** Frontend Architecture, Design Systems, Component-Driven Development, Redux Toolkit, Context API, SPA/SSR/SSG
- **Engineering Practices & Testing:** Git, CI/CD, Agile/Scrum, AI-Assisted Development, Vitest, React Testing Library

Professional Experience

Independent Engineering & Applied AI Development

Planned Career Transition & Advanced Technical Projects | **May 2025 – Present**

- **Real-Time AI & Streaming Interfaces:** Architected full-stack web applications utilizing Next.js (App Router), TypeScript, and Tailwind CSS; integrated LLM streaming APIs via Server-Sent Events (SSE) and bidirectional WebSockets for real-time token rendering and reactive workflows.
- **Secure Authentication Systems:** Implemented robust auth architectures utilizing JSON Web Tokens (JWT) with HTTP-only cookies, token rotation schemes, and role-based access control (RBAC) across modular API routes.
- **State & Performance Optimization:** Managed complex asynchronous state, client-side caching, and optimistic UI updates to achieve sub-second perceived latency and optimal Core Web Vitals scores.

Reasonlabs

Senior Frontend Developer | Jul 2023 – Apr 2025

- **Browser & Desktop Architecture:** Architected scalable browser security extensions using React, Next.js, and GrowthBook for feature flagging; co-developed an Electron.js desktop security solution with custom loaders and real-time scanning flows.
- **System Modernization:** Led design system migration from legacy SCSS to Tailwind CSS, substantially decreasing technical debt and establishing consistent UI component standards across squads.
- **Secure Communications:** Architected secure browser extension communications and API handshakes with backend microservices using JSON Web Tokens (JWT) and encrypted local storage.
- **Testing & Quality Baselines:** Instituted automated unit and integration testing workflows using React Testing Library and Vitest, lifting core module test coverage past 60%.
- **Technical Leadership:** Mentored junior frontend engineers, established rigorous code review protocols, and standardized TypeScript/React coding conventions.

Innovations Group (Client: Miral Experiences)

Senior Frontend Developer | Jan 2023 – Jun 2023

- **E-Commerce Development:** Engineered a dynamic "Multi-Package" booking flow (dated and non-dated packages) for a major entertainment platform, directly opening new digital revenue streams.
- **CMS & Search Integration:** Orchestrated end-to-end integration across Sitecore CMS, Coveo Search API, and backend payment gateways to deliver sub-second product discovery and secure checkout experiences.

Cognizant Technology Solutions (Client: Leading Middle East Bank)

Frontend Developer | Jul 2016 – May 2022

- **Headless Migration:** Revamped core retail banking portals into a modern Headless Sitecore architecture using React and Redux; integrated mission-critical APIs for live FX rates, branch locators, and credit card benefits.
- **Enterprise Intranet & Security:** Built a secure enterprise intranet using React, implementing Single Sign-On (SSO) via Active Directory and role-based access control (RBAC).
- **Performance Optimization:** Re-architected heavy legacy widgets into lightweight Single Page Applications (SPAs), accelerating initial load speeds and handling high-volume financial data visualization.
- **Brand Platform:** Built a performance-optimized brand portal using Node.js with secure third-party video delivery integrations.

Earlier Professional Experience

- **Software Engineer | Netweb Software** (*Sep 2014 – Jun 2016*)

Modernized enterprise intranet applications for steel and hospitality clients using responsive HTML5/JS; developed custom B2B web portals and integrated secure payment gateways.

- **Software Engineer | Allscripts** (*Sep 2013 – Sep 2014*)

Developed backend C# logging modules and SQL-based auditing mechanisms to monitor enterprise healthcare application events and triage system defects.

Education

- **Master of Science in Computer Applications (M.Sc. CA)**

Symbiosis International University | *Graduated Mar 2013*

- **Bachelor of Computer Applications (BCA)**

Sardar Patel University | *Graduated Mar 2011*
